

# YOUR TRUSTED SOURCE FOR INFORMATION SECURITY

TrustedSec is a highly specialized information security company made up of some of the industry's most respected individuals. We work with our business partners to increase their security posture, helping to reduce risk and potential impact in an ever-changing cyber landscape.

## Dave Kennedy

Founder of TrustedSec, Binary Defense & DerbyCon  
Former CSO of Fortune 1000 company & USMC Signal Intelligence  
QSA, OSCE, OSCP, CISSP, ISO 27001, GSEC, MCSE

// When I started TrustedSec, it was about changing the security industry for the better ... My goal was to assemble the most technically advanced team, people I have gone through my entire career with. Our consultants speak and teach at conferences, continuously writing tools and techniques ... We are the leaders. We are the visionaries."

## Making an Impact in the Information Security Industry

- Social-Engineer Toolkit (SET)
- SHIPS
- Unicorn

- Training
- Vulnerability Assessment

### Technical Team Leaders

L-R: Larry Spohn • *Force & Research*  
 Martin Bos • *VP, Technical Services*  
 Scott White • *Web Application Security*  
 Paul Koblitz • *Incident Response*

## Advisory Services

Information security risk is now a mainstream risk that affects organizations and corporations of all sizes and industry verticals. Developing and maintaining an effective security strategy can be difficult with the lack of available talent for security analysts, security engineers, and especially at the management level.
